- Quick Installation Guide

Increase your flexibility with the machineCam accessories

Flexi Pack X

No need for a power source.
No need for permanent mounting.
Place the camera wherever you want thanks to battery and magnet holder for the camera.
Rechargeable battery with running time of 10h – 15h.

Extra camera kit

It is possible to use up to 4 cameras to the same monitor.
Possible to see 2 cameras at the same time with split-screen.

Wireless and flexible camera system for professional needs.

machineCam is the first wireless system that matches the high image quality of

professional cabled systems, but with the freedom of wireless technology.

This system will offer the best of both worlds: Monitor brightness will be doubled (for problem-free usage in backlit situations) and it will offer breath taking HD monitor resolution. On the monitor, it will also be possible to select a split screen for 2 concurrent camera views in full-size format.

Easy to install - Easy to use - Wireless that works.
